## Deck Park 110 Combi Pro EI - 4WD

---

A front-mounted pro cutting deck with three blades for Stiga Park 4WD.

110 Combi Pro is front-mounted for better overview and easier accessibility. Three blades are free rotating with Multiclip to cut the grass finely for fertilizing. The deck can without any tools be changed into a rear-discharge deck. The deck cuts with excellent result.

The deck is extremely sturdy with a solid frame around as protection. The deck adjusts up and down, with an electric switch while the frame stays in the same position. The front pivot wheels have ballbearings, well water protected. Pivot wheels make steering in sharp bends easier. Exchangable slide plates and a rubber sheet over the rear discharge. The deck can be raised and angled into a cleaning position without removing the belt.
